

CYBERSECURITY

PASSWORD SECURITY: PROTECT YOUR ACCOUNTS

2026

THINK PASSPHRASES, NOT PASSWORDS

Make it **LONG**. Use **4 or more random words** and aim for **15+ characters**

1

MAKE IT UNPREDICTABLE

2

Choose unrelated words. Avoid predictable phrases, quotes, lyrics, or personal information

USE A PASSWORD MANAGER

A reputable password manager can generate and **securely** store different passwords for your accounts.

3

TURN ON MFA

4

ACSC describes MFA as one of the most effective protections against unauthorized account access. Enable it when available—including on your password manager.
